Why Golf Gum?

"A moderate dose of caffeine consumed before and during a round of golf improves golf-specific measures of performance and reduces fatigue."

– The National Institutes of Health

"Players who took caffeine scored two strokes lower, drove the ball further, and hit more greens in regulation."

– Golf Digest

Golf Gum is the best of both worlds with gum and caffeine (and B vitamins!) to give you the edge you need to be successful on and off the course.

Is this really a gum?

- Yes, it's a functional gum with a Xylitol gum shell that delivers the energy benefits to you, the chewer.

Why is Golf Gum bigger than most chewing gum?

- To fit all of the energy in the Liquid Core™.
- Golf Gum's shell also has the most Xylitol of any gum on the market which helps strengthen tooth enamel and prevent cavities.
- Golf Gum also gets smaller as you chew it!

What's up with the Liquid Core™?

- It contains ~80 mg of natural caffeine from green coffee beans plus B vitamins.
- The Liquid Core™ Delivery System means that you start feeling the effects of the caffeine and B-vitamins almost instantly.

Do I have to chew this for the entire back nine?

- No, however our delicious spearmint flavor can last for an hour+ and you only have to chew it for a few minutes to reap the benefits of Golf Gum.

Off the course:

- Chew Golf Gum for a morning pick me up or after lunch to get you through the rest of your day plus help freshen your breath.
- Heading to the gym after work or on the weekend? Chew Golf Gum minutes before and get the boost you need to power through your workout.

Bottom line – use Golf Gum whenever you need it. You'll feel the effects in minutes.

***Have enough energy?**

Simply squeeze out the Liquid Core for a refreshing piece of spearmint gum without the pick-me-up.
