

PondHawk®

The Solar Direct Aeration System

from Linne Industries

Nearly all ponds need management to help keep the habitat, water quality and clarity in a healthy balance. Far too often though, ponds are neglected or treated with chemicals and dyes, which can easily damage the delicate pond ecosystem. PondHawk is a solar-powered aeration system that works without batteries. It is designed for use 365 days a year and requires minimal maintenance.

And because PondHawk is not connected to the electric grid, its operating costs are very low. The innovative design installs quickly, doesn't require a special license and can be situated away from the pond and easily secluded if necessary.

PondHawk is quiet, doesn't require a lot of space and operates without batteries, making it the most ecologically-friendly solution on the market

The cost-effective pond management solution

- Increases dissolved oxygen, eliminates stratification and improves water quality by naturally reducing ammonia, nitrogen, and phosphorus
- Delivers micro-bubbles even under heavy cloud cover
- Maintains capacity, deferring dredging costs
- Mitigates algae, mosquitos and controls pond odor
- Features a tamper resistant powder-coated steel structure
- Requires very little maintenance
- Inconspicuous and self-contained
- Installs in as little as three hours

PondHawk in action at the Federal Club, Glen Allen, VA.

The chemical-free, off-grid technology that keeps your pond healthy.

PondHawk® is the worry-free, low-maintenance system that delivers a NEW solution to pond management.

The unique, patented design of PondHawk was created to fulfill the long-term needs of the pond manager. The construction is durable and reliable, working year-round to aerate the water even under cloudy or freezing conditions. Because it's a stand-alone, self-contained system with no connection to the power grid, PondHawk can be installed nearly anywhere—no matter how remote. While its small footprint allows it to be inconspicuous, PondHawk is also scalable —allowing units to be combined to fit any large pond or lagoon. Each PondHawk can aerate any shape pond up to 1.5 acres with 1-4 diffusers per system.

PondHawk Pricing

The installed price of a PondHawk system varies due to site specific conditions. Contact us to provide pricing for your pond.

- Lower installation and operating costs than on-grid aeration
- Lower maintenance and longer life than battery-powered aeration
- Less than 1.5 year simple payback by maintaining capacity and avoiding dredging costs

PondHawk System Includes:

- Solar Panel
- Enclosure and Mounting System
- Commercial Compressor
- Controller
- Airline and Tubing
- Industrial Grade Diffuser
- 3-Year Warranty
