

ORKIN® AIRREMEDY™ SCENT SERVICE

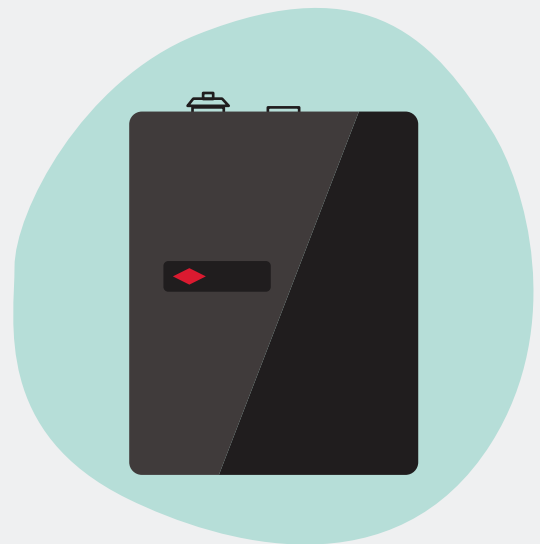

The Best in Pests™

If you walk into an environment that smells bad, chances are you won't want to return. Scent is the most powerful of our five senses, making it either the biggest asset or biggest threat to your business. This is why Orkin® offers AirRemedy™ Scent Service.

AirRemedy

- ◆ Helps eliminate foul odors for good, not just mask them.
- ◆ Utilizes cold fusion technology to deliver a dry vapor in any of these scents: Alpha Neutral, Apple, Conifer & Laurel, Crushed Lime Mint, Green Tea & Thyme, Matcha Tea, Sunny Citrus or White Tea & Ginger.
- ◆ Enhances your customer's experience.
- ◆ Three sizes available to accommodate your business' specific needs.

Orkin's Approach:

Inspection. Evaluation of your business for odor issues.

Installation. Your Orkin Pro™ will install the diffuser in one of two ways: wall mounting the unit or connecting the unit inline to your HVAC system.

Consultation. Provide you with a customized scent service plan and establish our recommendations, such as size of unit and optimal location placement.

Maintenance. Your Orkin Pro will regularly check on your diffuser and replace scent cartridges when necessary.

Enjoy a breath of fresh air with AirRemedy Scent Service.

Contact Orkin to schedule your free inspection.
